1. PURPOSE

This procedure establishes the requirements for respiratory protection for personnel working with the Environmental Restoration Program at the Rocky Flats Environmental Technology Site (Rocky Flats).

This procedure establishes the requirements for posting respiratory protection areas for work by the Environmental Restoration Program at Rocky Flats.

This procedure implements requirements from the following:

- Rocky Flats Environmental Technology Site Radiological Control Manual
- DOE Radiological Control Manual
- 10 CFR 835, Occupational Radiation Protection

2. SCOPE

This procedure applies to Rocky Flats employees and subcontractors involved in the determination of personnel entry control requirements and the posting of areas where respiratory protection is or may be required at environmental restoration projects.

This procedure addresses compliance with Radiological Operations Instructions (ROI) by Environmental Restoration Program personnel and Environmental Restoration Program subcontractors.

This revision is a total rewrite and revision bars are omitted.

This revision supersedes 3-21000-OPS-EMRG-9.1, Revision 0.

3. OVERVIEW

This procedure sets out specific instructions to be followed by subcontractors performing environmental restoration work at Rocky Flats. To avoid duplication and ensure timely implementation of future changes to Department of Energy (DOE) directives, the subcontractor is directed to follow the instructions in the ROI and to substitute the subcontractor's personnel titles for those contained in the ROI. No substitutions may be made for the signs required by 4-K75-ROI-09.01, Respiratory Protection Requirements and Posting. Subcontractors are authorized to use forms for recording data other than those forms contained in the ROI where they can show that the information gathered is the information required by the ROI.

4. PREREQUISITE ACTIONS

Health and Safety Specialist (HSS)

- [1] Observe the appropriate Limitations and Precautions, Prerequisites, and Instructions in 4-K75-ROI-09.01 and the Site Specific Safety Plan. If questions arise concerning technical instructions and guidelines in the ROI, resolve them with the Environmental Restoration Radiological Engineer (ERRE).

4. PREREQUISITE ACTIONS (continued)

Health and Safety Specialist (HSS)

- [2] Brief all personnel involved in the survey that 4-K75-ROI-09.01 refers to performers by unique titles and that the following equivalent titles apply.

Radiological Operations (RO) Supervision	=> Environmental Restoration Radiological Engineer (ERRE)
Radiological Control Technician (RCT)	=> Health and Safety Specialist (HSS)

5. INSTRUCTIONS

HSS

- [1] **WHEN** environmental restoration activities are being conducted in an area where airborne contamination may be present,
THEN:
- [A] Ensure that all personnel working on the project are briefed on the contents of 4-K75-ROI-09.01.
- [B] Post the area in accordance with 4-K75-ROI-09.01.
- [C] Make an entry in the Field Logbook in accordance with 2-S47-ER-ADM-05.14, Use of Field Logbooks and Forms, and specify actions taken.
- [2] **WHEN** environmental restoration activities are complete,
THEN ensure that all postings remaining meet the requirements of 4-K75-ROI-09.01.
- [3] **IF** areas were deposed as a result of environmental restoration activities,
THEN ensure that all deposing was accomplished in accordance with 4-K75-ROI-09.01.

6. RECORDS

There are no records generated by this procedure.
